[The following from the "Journal of a traveler" has been handed to us for publication.]

### Janesville.

"This beautiful city, which I reached on Saturday the 24th inst., is situated near the center of Rock county Wis., and contains from ten to twelve thousand inhabitants. It has railroad connections with Chicago and Milwaukee on Lake Michigan, and Prairie du Chien on the Mississippi river. The water power afforded by Rock river is excellent for manufacturing purposes, but I should judge from a cursory glance, that its value in this respect is not fully appreciated. This river is a shallow too small for navigation; but meandering as it does through the midst of the city, over a bed of rock, and crowned with beds of limestone, or hagged with gentle slopes from the prairies, affords a picturesqueness seldom equaled. While passing over the last eight miles of road from Chicago I conjectured that there must be a *thrifty village ahead*, from the beautiful farming country through which we were traveling. This conjecture was not ill-founded.

The principal thoroughfares of Janesville I found so crowded on to occasion the inquiry as to whether there was not a fair going on or a convention being held in the city. But this was perhaps an unusually stirring day; if not, then certainly the good people of Janesville will not be flattered if I should write it down in my journal that this is the most business like place of its size I have stopped at in the whole north west. It is liberally laid out, and possesses a number of private residences that compare favorably with those of larger places. Among the architectural adornments worthy of particular mention, I note the Institute for the Blind. This is a stone structure from the quaries in the immediate neighborhood. It is a limestone, slightly variegated with a modest tint of yellow, not glaring to the eyes, like white marble nor frowning and somber like the brown sandstone of the east. It is constructed after the modern school of architecture, and consists of main and lateral wings. It is surmounted with an octagonal cupola having an O. G. dome, which is supported by eight fluted columns with elaborately ornamented corinthian capitals. From this cupola I obtained a magnificent view of Janesville and its surroundings. I have stood upon the Porepine mountains, that skirt Superior, and the scene was a varied one; from the heights of the Alleghenies I have looked upon a wild wilderness at view, but this outquaint either in diversity and beauty of landscape. Before me lay the city, spread out upon the slopes of the river like a map. From out the distance, where the sky is wont to kiss the earth, comes the meandering river that stretches its lazy length away for miles in serpentine windings. Far away to the south the high table lands are spread out, chequered with fences, dotted with houses and ornamented with groves. I could only conjecture how far beyond the sweep of vision these prairies reach, as the sky seems to rest down upon them, intercepting the "visual ray serene." Beautiful are the valleys of Cashmere and Tempio in the land of the citron and the vine; and beautiful are the valleys of the Lena where the stately palm is nourished, but here, not enchanted by distance is

"A thing of beauty and a joy forever."

Dr. W. H. Churchman, a gentleman of large experience in educating the blind, is sup-erintendent. I have known this gentleman for many years, and can testify to his indefatigable zeal in building up institutions of this character, and congratulate the citizens of the state in having it entrusted to his care. Practical, experienced, a hard worker and thoroughly skilled in the difficulties to be encountered in such an enterprise, the institution of which he has charge cannot fail to take rank with the oldest and best of the country.

### Money and Notes Found.

A wallet, with money and notes, was found in this city last Friday. The owner can hear of the finder of his property by calling on Patrick Conners, 3 doors from the Western Bakery.

sep27dwtw.

### New Books.—Sutherland has a choice lot of new books. See his advertisement.

Masses. Burrows.—Have we city fathers? Have they noses, and have they any smellers in their noses? If they have I would invite them on the first sunny day to take a stroll at that intolerable nuisance on the corner of Main and Court streets. The tenants who occupy the building on that corner make use of the sidewalk on Court street as a place on which to spread and dry their stinking hides; the cellar door during the day is generally open, and ex-pose the stench of carrion arising therefrom. The business carried on, in the manner it is kept, and conducted, is a nuisance, and should be abated.

### STATE FAIR.—The state fair commenced on Monday, Sept. 26, at Milwaukee. The grounds are fifteen minutes walk from Spring street bridge and lie on the north side of the road (Spring street) near the residence of Elisha Eldred. The Sentinel says that the avenue leading to the grounds is the finest drive in the city; is in good condition and has excellent plank sidewalks the entire distance.

Altitude.—Jo. Cose defines the exact height of a young lady's ambition to be two feet.

## Proceedings of the City Council.

AN ORDERED MEETING, SATURDAY EVENING, September 24.

Present.—The Mayor and all the Aldermen but Mr. Balton.

A petition from N. Swager, and others, to open High street to Jackson street was referred to the aldermen from the 4th ward.

A communication was received from the teachers in the public schools, representing that the orders signed in payment of their wages were not paid, and asking the council to make provision for prompt payment, or make the orders draw interest. Referred to the school committee.

On motion of Ald. Pense, \$94.27, the balance of the proceeds of the sale of a school house was appropriated to the board of education, to be expended in finishing the cupola of the high school building.

A communication was received from the Chief Engineer, remonstrating against permitting both engine companies to leave the city at the same time.

On motion of Ald. Vermilye, the resolution permitting engine company No. 2 to leave for the state fair was reconsidered, and the matter was left in the hands of the chief engineer.

The judicial committee reported in favor of paying the city assessors \$10.12 each for taking the militia list, and against a claim of \$72 each for taking agricultural statistics. Report adopted.

The following bills were reported favorably by the finance committee and ordered paid.

R. J. Richardson, hardware, \$8.49

G. Doisen, sheriff fees, 116.80

G. C. Gillett, constable fees, 57.86

G. R. Curtis, fire department, 4.71

Pendleton & Bigelow, lumber, 5.80

A. C. Perkins, labor on bridge, 9.68

Chas. Holt, printing, 27.00

E. Ruger, city engineer, 152.25

On motion of Ald. Prichard, orders to the amount of \$547.87 were authorized in favor of Edwin Gibbs, to liquidate a judgment against the city, of which \$25.10 was to be paid to I. C. Sloan for costs.

The time for the collection of city taxes was extended twenty days from the 4th day of October next.

Bonds to the amount of \$2000 was ordered issued to Ald. Pratt, in payment of the award made by the Hon. David Noggle in the high school building contract.

An order of \$80 was authorized to David Noggle for his services as arbitrator in the above case.

The gas committee reported a proposition from the lessees of the gas work to furnish the city with gas at \$3 per 1000 feet. Proposition accepted.

Council adjourned.

Mr. Sutherland has received Harper's Magazine for October.

A LYNX KILLED NEAR MILWAUKEE.—Peter Dans killed within two miles of Milwaukee, Thursday last, a monstrous lynx, measuring at least 3 feet in length, and a foot and a half high. The animal was treed by dogs near Fond du Lac road, and was brought down with a charge of shot.

RAILROAD TROUBLES.—The Watertown road (says the Wisconsin) now carries its freight over the La Crosse road to the Junction, and from thence down the Fond du Lac road to the place of destination. Passengers for Watertown and vicinity have to take the Mississippi cars as far as the Junction (16 miles out) and then change to the Watertown road. The trouble is that the Milwaukee & Mississippi people do not propose that a rival line shall run along side of them, and use their track, if they can help it. They therefore demand that the Watertown people should charge the same rates from Sun Prairie that they do from Madison, and increase the per centage paid to them for using their track. This was refused, and hence the quarrel.

The Prince of Wales appears to be leading a pleasant though not idle life in the modern Athens. Now, we find him studiously engaged in one of the University lecture room with Dr. Lyon Playfair, or in company with the same distinguished chemist, making himself acquainted with some of the most interesting and important of our manufactures. Again, he is to be seen taking part in some manly exercise, or lurching himself into the mysteries of military evolutions by attending the reviews which take place in the neighborhood of Edinburgh. It is again positively asserted that the Prince will visit Canada in the course of next year, and that his tour will be made under the direction of no less a personage than the secretary of state for the colonies.

Manchester Guardian.

### WHAT IS FAME?—A life of the famous Countess of Huntingdon, who gave \$500,000 to religious movements, has recently been issued in England. The London Critic, giving an account of her ladyship, says: "Her monument has the most long-winded epitaph ever written."

HISTORICAL.—A young prince of the illustrious house of Monaco was asked why he had married a rich old woman. "Ma foi," was the gay young prince's reply, "let me ask you, what poor man in a hurry to get an enormous bank note cashed troubles himself to look at the date of it."

## COMMERCIAL.

Janesville Wholesale Market.

Reported for the Janesville Gazette, by

**BUMP & GRAY,**

GRAIN AND PRODUCE DEALERS.

JANESVILLE, SEPTEMBER 25, 1859.

We make up prices as follows:

WHEAT—white winter, 75c; fair to choice, 80c; common to good shipping quality, 65c.

CORN—shelled, per 60 lbs., 62c; new in ear, per 70 lbs., 45c.

BARLEY—in demand at 40 to 52 for fair to choice, samples.

RYE—in good demand at 50c; per 60 lbs.

OATS—in active demand at 22c; 35c.

WHEAT—white winter, 75c; fair to choice, 80c; common to good shipping quality, 65c.

CORN—shelled, per 60 lbs., 62c; new in ear, per 70 lbs., 45c.

BARLEY—in demand at 40 to 52 for fair to choice, samples.
